

APPLICATIONS — DAY 8			
Time	Activity Description	Intended Learning Outcomes	Relevance
		<i>After completion, trainees will (be able to):</i>	<i>Why this is important for you as:</i>
1540-1625	Introduction of the practical analysis in group (Carla Rodrigues)	<p>Learn about the dataset to be used during the practical session in groups</p> <p>Learn about the methods which will be used during the practical session in groups</p> <p>Dividing participants into groups</p>	<b>Bioinformaticians, Microbiologists and Epidemiologists</b> will be aware of exercises, datasets and group distribution, useful for the practical session in groups

## Details

### Introduction of the practical analysis in group

In this session, participants will familiarize with the dataset to be used during the session, gaining insights into its relevance to the topic at hand. Additionally, participants will learn about the methods that will be employed. Overall, this session aims to provide participants with a comprehensive understanding of the practical analysis session. The dataset will be taken from published studies on FWD surveillance and outbreak investigation. Participants will follow guided exercises.
