

APPLICATIONS — DAY 10			
Time	Activity Description	Intended Learning Outcomes <i>After completion, trainees will (be able to):</i>	Relevance <i>Why this is important for you as:</i>
1400-1530	Analysis of data in groups (presentations)	Presentation of the results of the analyses performed in groups	Bioinformaticians, Microbiologists and Epidemiologists will engage in group presentations to report on the results of analyses performed by multidisciplinary teams.

Details

Analysis of data in groups (presentation)

Participants will present the results of their genomic analyses which will emphasize teamwork, critical thinking, and effective communication. Additionally, it aims to enhance participants' skills in data analysis, interpretation, and presentation, fostering interdisciplinary collaboration and advancing research in bioinformatics, microbiology, and epidemiology.
