Online Slides Show

Some details about Galaxy@Pasteur:

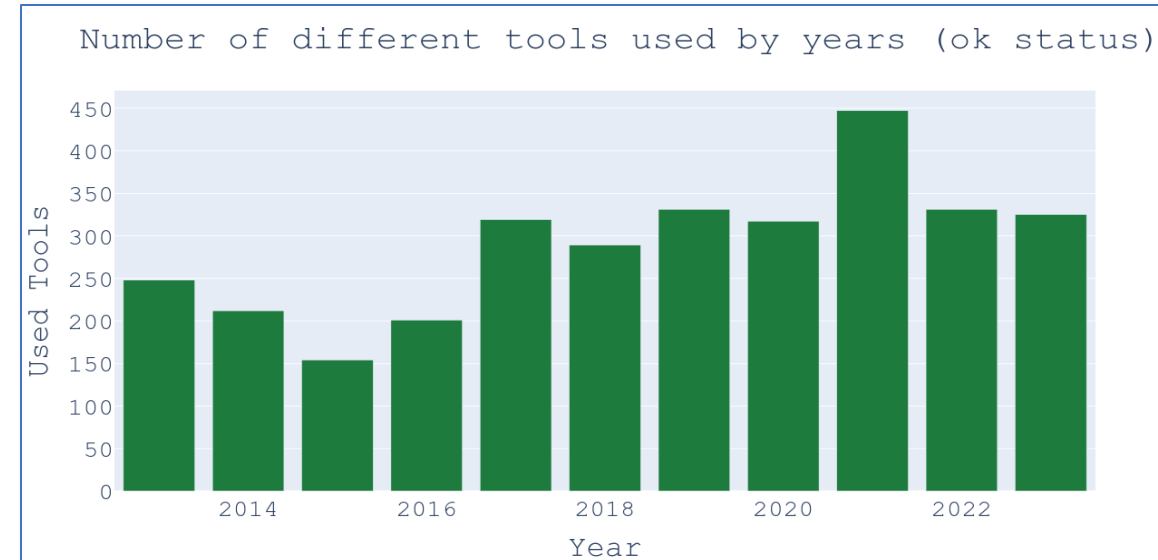

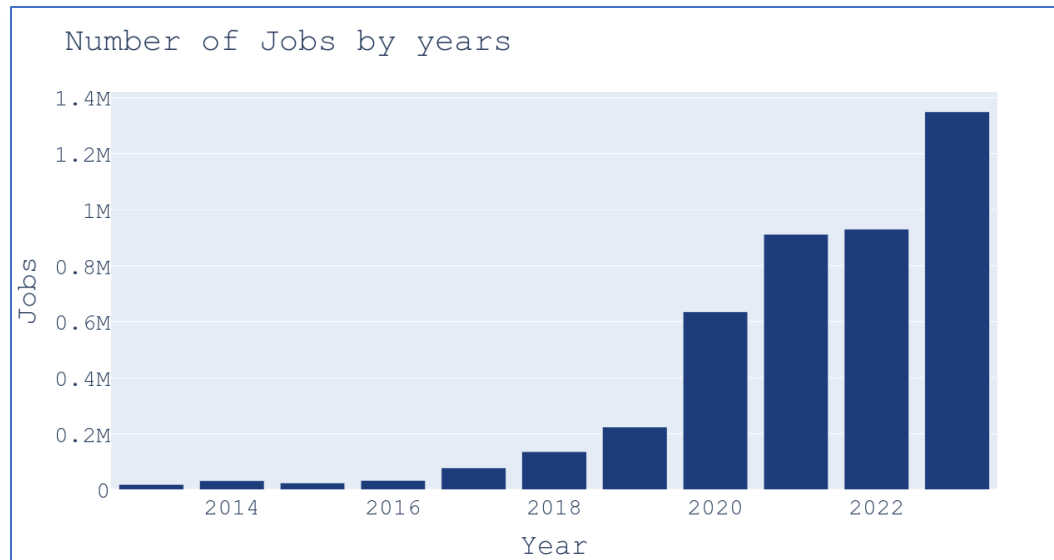

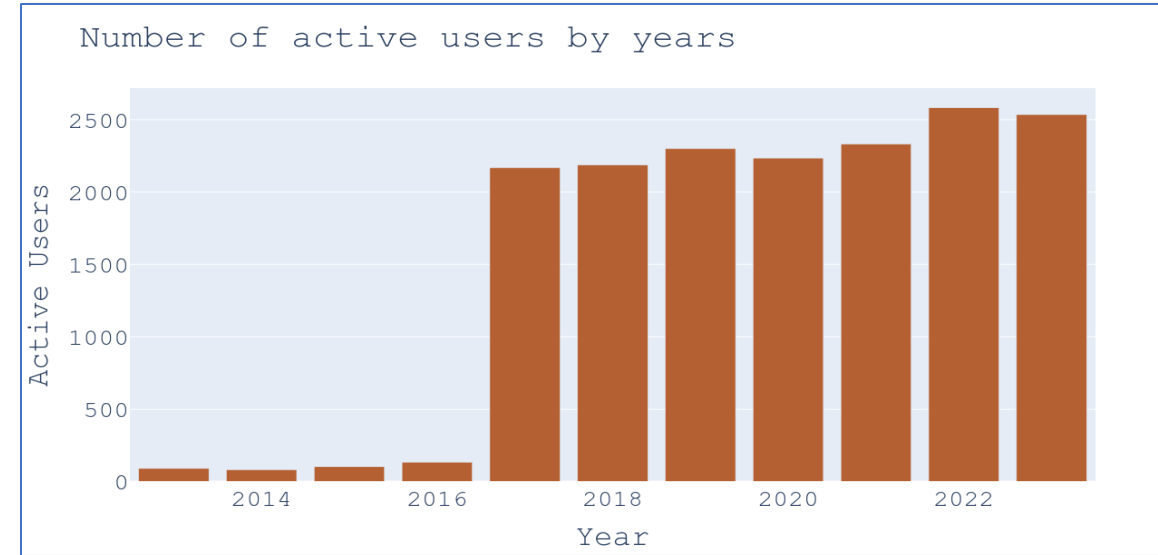

- It is available for internal users since March 2013 and external users since October 2016
 - <https://galaxy.pasteur.fr>
 - External users have less storage resources and not access to tools with license
- It is linked to the Institut Pasteur cluster resources
 - Some tools developed at Pasteur are available on it, like TXSSCan or CapsuleFinder
 - More than 300 tools are available on our platform
- Galaxy is a way to give access to our resources and development to the entire research community

Activity and users increase continuously since the platform opened in 2016

- over 2500 active users
- over 1.3 million jobs last year

We provide support for integrating tools into the Pasteur Galaxy

- For a new tool or a new version of an existing tool, contact galaxy@pasteur.fr

Hands On: It's your turn

The best way to learn is to practice, so we invite you to follow a hands-on session to apply what you have just seen.
